Baden-Württemberg Scholarship

Dear Professor Pontt Olivares,

We are very happy to see the co-operation between our two institutions developing into such a positive direction.

To expand the international exchange of qualified students between your prestigious center and our department of Mechatronics and Natural Sciences we would like to offer a "Baden-Württemberg-Scholarship" for the academic year 2003/2004 (starting in September 2003) to two of your students.

Precisely we are thinking of a grant which is aimed at highly qualified graduates and post-graduates. The students selected by your institution and admitted by our University of Applied Sciences will pursue the Master degree in Sensor Systems Technology and receive

650 € per month (complete duration of the scholarship = 10 months).

For the application the following documents are required:

- Curriculum vitae
- Bachelor certificate
- Transcript of records (for the whole duration of the studies)
- Toefl (min. 550)
- Highly recommended is GRE general

Please submit the applications for this scholarship to our office not later than March, 31st, 2003.

We are looking forward to hearing from you.

Best wishes

Dr. Gertrud Schink
- Director Office of International Programs -
